Web managed Gigabit Ethernet PoE switch from Digisol

Digisol, a leading provider of networking products, has released the DG-GS1512HP, a Web managed switch with eight Gigabit PoE ports. The intelligent network-manageable device comes with four Giga combo ports and four SFP slots, and is designed for network environments that require high performance, high port density and easy installation.

The switch also supports VLAN, port mirroring and port trunking. It is an L2 Web managed device with 24Gbps switching capacity. It helps users to improve the responsiveness of applications and file transfer. With four Gigabit SFP ports, the device offers high speed uplinks to servers.

Ensuring faster recovery from failed links and enhancing overall network stability and reliability, the IEEE 802.1w Rapid Spanning Tree Protocol provides a loop-free network and redundant links to the core networks with rapid convergence.

The port security feature of the switch ensures access to switch ports based on a MAC address, limiting the total number of devices from using a switch port and protecting against MAC flooding attacks.

The DG-GS1512HP is available for purchase online and via authorised dealers.

Address: Digisol Systems Ltd, Smartlink House, Plot No. 5, Bandra-Kurla Complex Road, Santa Cruz (E), Mumbai 400098

Pocket-friendly smartphones from Micromax

Indian consumer electronics company Micromax has launched its latest smartphones – the N12 and N11—under the new Infinity-N series. The smartphones come with a 15.7cm (6.19 inch) HD display with an aspect ratio of 18.9:9 and a glossy rear panel.

Equipped with a fingerprint scanner and dual cameras on the back, both the smartphones run on Android 8.1 Oreo, out of the box, and will upgrade to Android 9 Pie, claim company sources.

Both the devices feature the same design and specifications, but vary in terms of the front camera configuration and memory. The N12 comes with 3GB RAM along with 32GB

internal storage, while the N11 features 2GB RAM with 32GB storage.

The smartphones are powered by MediaTek's Helio P22 chipset clocked at 2GHz.

Both phones feature a rear camera with a 13MP + 5MP sensor configuration, with the N12 featuring a wide angle lens.

On the front, the N12 comes with a 16MP sensor while the N11 sports an 8MP camera.

Backed by a 4000mAh battery, the smartphones are said to deliver around 30 hours of talk time and 18 hours of audio playback.

Both the smartphones are available for purchase from retailers.

Price:
₹ 8,999 for N11 and
₹ 9,999 for N12
