

Wireless mesh system with multiple nodes from Linksys

Price:
₹ 7,999 (one pack),
₹ 14,999 (two packs)
and
₹ 21,999 (three packs)

Linksys, a manufacturer of data networking hardware products for home and offices, has recently launched Velop, a wireless mesh system. Its multiple nodes connect wirelessly with the primary node, which is directly plugged to the Internet and hence offers a seamless Internet network across your home or office.

The system comes with six antennas and high powered amplifiers. Each unit is a tri-band dual stream router with two 5GHz bands (up to 867Mbps) and one 2.4GHz band (up to 400Mbps). The system can be easily set up with the Linksys app (free for Android and iOS), connecting the first unit with the router of an existing Internet service and the rest with a step-by-step guide from the app.

Once connected, the individual mesh nodes can be placed for seamless Wi-Fi coverage even in the remotest corner of a home or office. The Linksys Velop comes with features like self-healing and self-selection. The former ensures that other nodes remain connected even if one node gets unplugged accidentally, while the self-select feature allows the device to select the clearest channel for your devices.

The system comes with a 716MHz quad core processor, 4GB Flash memory and 512MB RAM. The Linksys Velop can be purchased in different capacities of one, two or three packs, depending on the size of your home or office, via Amazon.

Address: Amazon India, Brigade Gateway, 8th Floor, 26/1, Dr Rajkumar Road, Malleshwaram (W), Bengaluru 560055

Gaming keyboard with mechanical key switches from HyperX

HyperX is a manufacturer of computer peripherals and a subsidiary of Kingston Technology. It has recently launched the Alloy FPS RGB keyboard featuring the Kailh Silver Speed mechanical key switches that offer shorter key travel time for faster gameplay.

It is a full-sized keyboard, featuring a solid steel alloy frame in a compact design, leaving table space for the mouse and mouse pad as well.

The Kailh Silver Speed key switches feature a light 40g actuation force and are rated for 70 million key presses. The key switch housing comprises exposed LED lights and five brightness levels, offering brighter and more radiant RGB lighting.

The keyboard offers options such as Game Mode to easily disable the Windows key, preventing gameplay interruptions, and also offers anti-ghosting and full N-Key rollover functionality.

The device features an easily accessible USB charging port at the back of the keyboard and a detachable braided cord offering additional flexibility and performance.

The keyboard is rugged, yet sports a stylish look with up to three custom lighting profiles that can be saved directly to the on-board memory.

The HyperX Alloy FPS RGB gaming keyboard is available online and via retail stores across India.

Address: Kingston Technology, 604 - 605A, Skylark Building, Building No. 60, Nehru Place, New Delhi 110019
