A smartphone with a rotating camera from Asus

Taiwanese computing giant, Asus, has launched the Zenfone 6, its latest high end smartphone, globally. The dual-SIM (Nano) smartphone features a 16.25cm full HD (1080 x 2340 pixels) IPS screen. Its front screen is covered with Corning Gorilla Glass 6 and the back features a 3D curved glass. The phone runs on Android Pie and is powered by the octa-core Qualcomm Snapdragon 855 SoC along with 8GB RAM and the Adreno 640 GPU.

This is the company's first smartphone with a rotating camera. It offers reduced bezels with an all-screen front. It features a dual camera setup which normally resides on the back, but rotates when needed while taking selfies. The camera module comes with 'fall protection', which automatically retracts the camera to its base position if the phone detects sudden movement.

The smartphone houses a 48-megapixel primary shooter with a f/1.79 laser focus and a dual-LED flash along with a 13-megapixel secondary ultra-wide-angle camera. It comes with a massive 5,000mAh battery with Quick Charge 4.0. It also features dual speakers as well as dual smart amplifiers, a 3.5mm audio jack and 256GB of internal storage, further expandable up to 2TB via a microSD card.

On the connectivity front, the smartphone features USB Type-C, NFC, Wi-Fi 802.11ac (Wi-Fi 5), Bluetooth 5.0 and GPS. The Asus Zenfone 6 is available via online and retail stores in midnight black and silver.

Unmanaged long range PoE/PoE+ switches from D-Link

One of the largest networking companies of India, D-Link, has launched its 6 port, 9 port and 18 port unmanaged long range switches, namely, the DES-F1006P-E, DES-F1009P-E and DES-F1018P-E.

These 100Mbps switches enable users to easily connect and supply power to PoE capable devices such as wireless access points, IP cameras and VoIP phones. The switches allow the transmission of data and power for distances of up to 250 metres. They are a good solution to address the growing SMB, SOHO

and smart home user market segments.

A user can connect PoE compatible devices to these switches without using additional power supply, which allows devices to be installed in locations that do not have access to power outlets.

The switches come with a 6kV lightning protection as well as switch mode functionality, which supports three modes of operation – QoS, VLAN and power.

The D-link switches are available in different prices via the company's wide network of national distributors.
