

Netgear's tri-band Wi-Fi 6 router for smart homes

Netgear, a leading provider of networking solutions for smart homes and offices, has launched its tri-band Wi-Fi 6 routers – the Nighthawk AX4 and AX8. The company claims that this latest generation of Wi-Fi 6 routers can deliver up to four times better performance than Wi-Fi 5 (802.11ac), using innovative technologies such as Orthogonal Frequency-Division Multiple-Access (OFDMA) to enable connecting multiple devices at the same time to help reduce typical bandwidth congestion.

The Nighthawk AX4 features Wi-Fi speeds of up to 3Gbps. It has an optimised dual-core processor that

Price:
Nighthawk AX4 for
₹ 29,999
and AX8 for
₹ 39,999

powers smart home automation, ultra-smooth 4K UHD streaming, online gaming, etc.

On the other hand, the Nighthawk AX8 features Wi-Fi speeds of up to 6Gbps, with eight Wi-Fi spatial streams – four in the 2.4GHz band, and four in the 5GHz band. It offers four times the device capacity compared to typical 2x2 AC Wi-Fi.

The Netgear Nighthawk tri-band Wi-Fi 6 routers—AX4 and AX8—are available for purchase via authorised Netgear partners and e-commerce portals.

Address: Netgear Technologies India Pvt Ltd, 21 Paharpur Business Centre, Nehru Place, New Delhi 110019

Digisol launches next-generation Gigabit Passive Optical Network (GPON) router

Digisol, a leading provider of IT networking products, has launched its 300Mbps Wi-Fi router—the Digisol DG-GR4342L. This router is designed to fulfil FTTH ultra-broadband access and triple play services for home and SOHO users.

Based on stable and mature GPON and Gigabit EPON technology, the router is reliable and easy to maintain. It comes with a guaranteed QoS and is fully compliant with IEEE 802.3ah EPON standards. The device is ideal for 'Fibre-to-the-Home' solutions as it allows users to access high speed Internet connections via the GPON port and enables devices to connect wirelessly at 300Mbps 802.11n speeds.

The Digisol DG-GR4342L offers an ideal terminal solution by converting the fibre optic signal into an electric one at the user side, and enables fibre optic Ethernet services to business and residential users through fibre-based network infrastructure.

The device is compatible with the ITU-T G.984 GPON standards and supports maximum data rates of up to 2.5Gbps downstream and 1.25Gbps upstream. Featuring a dual mode ONU (optical networking unit), the router works on both the GPON and Gigabit EPON technologies. It also supports advanced dynamic bandwidth allocation (DBA), further helping in bandwidth and traffic management of ONU.

With dual-stack Ipv4 and Ipv6, the router ensures compatibility with the next generation of the Internet, and enables a range of new services and improved user experiences.

The DG-GR4342L router is available via online and retail stores.

Address: Digisol Systems Ltd, Smartlink House, Plot No. 5, Bandra-Kurla Complex Road, Santa Cruz (E), Mumbai 400098
