G. BeingCert.com

Certifications: DevOps Foundation, DevOps Professional, DevOps Master

Skills validated in the different certifications are:

- DevOps Foundation certification ensures that the candidates understand the various DevOps tools and technologies, and use them in solving infrastructure issues. It gives complete knowledge of DevOps, service delivery and automation.
- DevOps Professional certification provides knowledge of the principles of continuous development and deployment, automation of configuration management, inter-team collaboration and IT service agility using modern DevOps tools.
- DevOps Master has been designed to emphasise on the collaboration and communication between IT professionals (developers, operators and supporters) in the life cycle of applications and services, which leads to continuous integration and continuous development.

H. Star Certification

Certification: Star Certified DevOps Expert

Skills validated include the ability to:

- Understand the DevOps methodology and its key concepts, and thoroughly understand cloud computing and virtualisation concepts

- Use DevOps tools like Ansible, Chef, Jenkins and SaltStack
- Manage source code using Git
- Deploy DevOps concepts to respond faster to client needs
- Explain version control with Nagios

Official website: <https://www.starcertification.org/Certifications/Certificate/DevOps>

I. CertiProf

Certification: DevOps Essential Professional Certificate (DEPC)

Skills validated are:

- In-depth understanding of DevOps, Agile software development, CI/CD
- DevOps and Agile, DevOps and Scrum, DevOps and ITSM (ITIL)
- Knowledge of various DevOps tools: Git, cloud platforms, Docker, JS, Chef, Jenkins, Puppet, etc.
- Reporting and monitoring skills

Official website: <https://www.certiprof.com/portfolio/certiprof-devops-essentials-professional-certificate/>

J. Global Association for Quality Management

Certification: Foundation Certificate in DevOps (FCDO), Certified DevOps Master (CDM)

Skills validated in the two certifications are:

- Foundation Certificate in DevOps (FCDO) provides an introduction to DevOps
- Certified DevOps Master (CDM) provides advanced knowledge with regard to DevOps

Official websites: <https://www.gaqm.org:8443/gaqm/certifications/showsubcontent?subcategoryId=58>; <https://www.gaqm.org:8443/gaqm/certifications/showsubcontent?subcategoryId=60>

K. Arcitura

Certification: Arcitura Certified DevOps Specialist

Skills validated are:

- DevOps practices, models and techniques -- business drivers, rapid delivery, responsive scalability and increased reliability, automation, measurement and unified metrics, DevOps platform and toolchain, DevOps tools, repositories and systems
- DevOps life cycle—IaC, configuration modules, policy as code, DevOps metrics, monitors, pipeline stages, microservices and cloud computing
