

Table 1: The roadmap for Blue Ocean

Features	Planned	In progress	To be ready soon	Released
Pipeline creation and editing				
Read and write for Github Enterprise				Yes
Read and write for Bitbucket Server				Yes
Read and write for Bitbucket Cloud				Yes
Read and write for native Git				Yes
Stage level configuration				Yes
Reordering steps				Yes
Full declarative parity		Yes		
Support for editing parameters	Yes			
Support using shared libraries from editor	Yes			
Support credentials as environment variables	Yes			
Specify parameters for build step	Yes			
Specify parameters for input step	Yes			
Read and write for Gitlab server	Yes			
Personal credential management	Yes			
Pipeline settings	Yes			
Read and write for Subversion	No			
Pipeline				
Parallel stages				Yes
Improvements to pipeline storage and performance		Yes		
Notifications	Yes			
Improved Docker pipeline engine	Yes			
Docker for Windows	No			
'Sidecar' Docker containers	No			
Multiple Jenkinsfiles	No			
Restart failed stages	No			
Replacing folders				
Fast dashboard search				Yes
Saved search	No			
Pipeline usability				
Improved behaviour of a running pipeline				Yes
Display run causes				Yes
Display reason for waiting run				Yes
Visualising skipped stages				Yes
publishHTML reports appear in Artifacts				Yes
ANSI colour logs				Yes
Distinguish tests by stage and parallel status			Yes	
Reduce length of step log		Yes		
Unstable stages, parallels and steps	Yes			
The status for pipeline stages, parallels and steps	Yes			
Steps to set stage or parallel status	Yes			
Linking downstream jobs	Yes			
Historical trends for tests and code coverage	No			
Support nested stages	No			
Support extra large/complex pipelines	No
