

Huawei E8372 dongle

Huawei E8372 Mi-Fi dongle:

Huawei offers its own unlocked Mi-Fi device that can tap into 4G LTE networks of most major Indian mobile service providers. The sleek gadget comes in the form of a dongle.

To run the device, plug it into a power source or a computer system through its USB port. Its Wi-Fi network can serve up to 10 devices simultaneously. It can also be plugged into the charging port of your car, so you can use it on-the-go. The device can be set up using the proprietary HiLink mobile application. The dongle comes with an expandable microSD memory slot. It is available online for ₹ 3499.

Digisol DG-HR1070MSE:

SmartLink Network Systems offers this compact 4G/3G Mi-Fi device under its Digisol brand. It supports most major network providers, and can generate a download speed of 150Mbps. The inbuilt Wi-Fi can connect up to 10 devices at a time. A 2000mAh battery allows it to run for about 10 hours. Power-saver mode further enhances the battery's longevity. The device has a microSD slot expandable up to 64GB. It is priced at ₹ 5200.

Vodafone R217 4G Mi-Fi:

Vodafone's latest Mi-Fi device supports 4G LTE connectivity with Wi-Fi coverage that supports 15 devices simultaneously. The two-step authentication (WPS and password) makes the device extremely secure. An 1800mAh battery powers the device for seven hours straight. There is a microSD expansion slot to support up to 32GB of storage. A mobile application and Web-based interface make the setup easy and quick. The device supports both prepaid and postpaid Vodafone services. It is currently available at a discounted price of ₹ 1950.

Airtel E5573 4G Mi-Fi: Huawei has partnered with Airtel to deliver a handy Mi-Fi device, E5573. It supports up to 4G networks. Download speeds can reach up to 150Mbps. The device supports 10 Wi-Fi devices simultaneously. It has a battery capacity of 1500mAh, which allows it to run for six hours at a stretch. The official model

is locked for Airtel SIM and is available for ₹ 999.

TP-Link TL-MR3020. TP-Link offers a unique Mi-Fi device in the form of TL-MR3020. It is a portable router that creates a hotspot using a connectivity source. A separate modem is required to carry a 3G/4G SIM and plug into the Mi-Fi router to access the Internet.

MR3020 comes with an Ethernet port where a LAN/WAN cable can be plugged in to create a hotspot. A switch on the gadget lets you toggle between three different modes of connectivity: travel (Ethernet), WISP and AP (3G/4G). The device supports multiple network providers including Airtel, Vodafone, BSNL and Jio. Connectivity can be configured through a Web interface.

Various ports and switches on TP-Link TL-MR3020

It comes with a strong battery life and a three-year warranty. Although its maximum retail price is ₹ 2199, it is available at discounted prices on online sites like Amazon.in.
