

Pocket-friendly Bluetooth speaker with surround sound

ZAAP, a company that believes in enhancing the customer experience with its innovative technology, has introduced a budget-friendly Bluetooth speaker with high-end features, called the Aqua Boom.

The speaker offers 360-degree surround sound with a rich deep bass, and comes with a compass and carabineer clip making it perfect for both indoor and outdoor use. It comes with IP-65 for complete protection against water, snow, dust and shock. The speaker is designed with a premium rubberised rugged exterior and has inbuilt 7-watt speakers. With its 1500mAh rechargeable Li-ion battery, the speaker is said to

provide eight hours of playtime and is compatible with iOS, Android and Windows devices.

With advanced 4.0 Bluetooth technology, the speaker consumes less energy and offers an impressive 15.24m (50 feet) range. The Aqua Boom speaker enables users to accept or reject calls, change tracks or adjust volume with its built-in microphone. The LED indicator notifies the user about battery status and connectivity. The ZAAP Aqua Boom speaker is packed with a microUSB charging cable, 3.55mm aux-in cable, a compass and a carabineer clip.

It is available via various e-commerce stores.

Address: ZAAP Technologies, Jasola, Level Elegance Tower, Old Mathura Road, Sanjay Colony II, New Delhi 110025

Layer 2 Gigabit dual stack switches from Digisol

Digisol, a leading provider of networking products, has launched its next generation Layer 2 gigabit intelligent switching series – DGGS4200. Designed for carrier and MAN networks, these switches support comprehensive QoS, enhanced VLAN functions like VPN, voice VLAN, QinQ, Ethernet ring protection protocol, classified bandwidth control, intelligent security control, etc.

The switches are equipped with the full GE ports and four SFP uplink ports which integrate advanced management and security functions to provide performance and scalability.

The switches come with many features like:

- Green energy, which dramatically lowers the power consumption due to the innovative port-LED shut-off function.
- Enhanced security mechanisms like prevention of SYN flood, land and ICMP flood attacks, along with DHCP snooping to prevent DHCP attacks and illegal DHCP servers.
- The series supports 4 gigabit uplink ports, which can be designed to offer redundant uplinks with various ring protection applications.
- The switches support MVR (Multicast VLAN Register), which selectively allows traffic to cross between different VLANs for bandwidth and security reasons.
- VCT (Virtual Cable Test) and DDM (Digital Diagnostic monitoring) for rapid detection of the network failures to reduce operational and maintenance difficulties.

The multi-functional switch series is available with two variants DG-GS4228 and DG-GS4228P, with the latter supporting PoE ports.

The Digisol DGGS4200 series can be purchased via retail stores across India.
