

DVD OF THE MONTH

The latest Ubuntu editions for your desktop.

Ubuntu 19.04, 64-bit live

This is a free and open source Linux distribution based on Debian. Ubuntu is officially released in three editions: Desktop, Server and Core. Ubuntu is a popular operating system for cloud computing, with support for OpenStack. We have bundled the live desktop edition of the latest release, code named *Disco Dingo*. This comes with the latest GNOME 3.32 release, offers Mesa 19.0, and makes use of Linux Kernel 5.0.

Ubuntu MATE 19.04 (64-bit)

Ubuntu MATE is a free and open source Linux distribution and an official derivative of Ubuntu. Its main differentiation from Ubuntu is that it uses the MATE desktop environment as its default user interface, instead of the GNOME 3 desktop environment, which is the default user interface for Ubuntu.

Ubuntu MATE 19.04 is a modest upgrade over previous releases. It comes with an improved out-of-the-box experience for NVIDIA GPU owners. The MATE Dock Applet has also been updated to 0.88—it introduces some new visual options, based on the look of the Unity desktop. The ISO image for the 64-bit live edition can be found on the DVD under the *other_isos* folder.

What is a live DVD?

A live CD/DVD or live disk contains a bootable operating system, the core program of any computer, which is designed to run all your programs and manage all your hardware and software.

Live CDs/DVDs have the ability to run a complete, modern OS on a computer even without secondary storage, such as a hard disk drive. The CD/DVD directly runs the OS and other applications from the DVD drive itself. Thus, a live disk allows you to try the OS before you install it, without erasing or installing anything on your current system. Such disks are used to demonstrate features or try out a release. They are also used for testing hardware functionality, before actual installation. To run a live DVD, you need to boot your computer using the disk in the ROM drive. To know how to set a boot device in BIOS, please refer to the hardware documentation for your computer/laptop.
