

```
# Compute the correlation matrix and average over networks
corr_df = df.corr().groupby(level="network").mean()
corr_df.index = corr_df.index.astype(int)
corr_df = corr_df.sort_index().T
```

```
# Set up the matplotlib figure
f, ax = plt.subplots(figsize=(11, 6))
```

```
# Draw a violinplot with a narrower bandwidth than the
default
sns.violinplot(data=corr_df, palette="Set3", bw=.2, cut=1,
linewidth=1)
```

```
# Finalize the figure
ax.set(ylim=(-.7, 1.05))
sns.despine(left=True, bottom=True)
```

ggplot

ggplot is a visualisation library that is based on ggplot2 of R. The plotting approach used in ggplot is based on Grammar of Graphics. ggplot is simple to learn. It can be installed using the Pip command as shown below:

```
pip install ggplot
```

A code snippet to build a plot using ggplot is shown below and the output is shown in Figure 8:

```
from ggplot import *
```

```
ggplot(aes(x='date', y='beef'), data=meat) +\
    geom_line() +\
    stat_smooth(colour='blue', span=0.2)
```

Pygal

Pygal is a simple visualisation library available in Python. The Pygal library can be installed using Pip.

Building plots with Pygal is fairly straightforward. A code snippet to build a simple bar graph is shown below, and the
