

Google Pixel

- Bluetooth 4.2, NFC, GPS
- Sensors:** Proximity/ALS, accelerometer/gyrometer, magnetometer, pixel imprint, barometer, Hall effect, Android Sensor Hub, and advanced x-axis for sharper response
- 3450mAh non-removable battery

Pros and cons

Pros: Brilliant low-light photography, long battery life, Google Assistant is better than Siri, the best version of Android (which will keep getting continuously updated), bright display.

Cons: Not water-resistant, pricey, no option to expand storage.

2. Samsung Galaxy S7 Edge

Samsung's S series of phones has played around with a few curved screen smartphones and has become a recognised technology now. Galaxy S7 Edge looks a lot like its predecessor S6, and even technologists call the S7 as S6. Samsung, however, has taken S7 Edge to the next level by introducing water protection and SD card support, and a few more tweaks. What sets the device apart is its high quality optics, wonderful display and performance when multi-tasking.

Technical specifications

- 13.97cm (5.5 inches) curved super AMOLED display with 534ppi

- Gorilla Glass 4
- Snapdragon 820 quad-core Kryo processor -- 2 x 2.15GHz and 2 x 1.6GHz, Adreno 530 GPU
- 4GB RAM
- 12 MP (rear) + 5 MP (front) with optical image stabilisation, face detection, auto-focus, LED flash
- Wireless charging
- 32/64GB internal storage; microSD card slot up to 200GB
- Connectivity:** Wi-Fi a/b/g/n/ac; Bluetooth 4.2, ANT+, NFC, GPS, GLONASS, BEIDOU
- Sensors:** Heart-rate monitor, barometer, SpO2 sensor
- 3600mAh non-removable battery with fast charging

Samsung Galaxy S7 Edge

Pros and cons

Pros: Easy to handle, fast processing, very good camera, IP68 protection, water resistant, wireless charging, luxurious design.

Cons: Fingerprint magnet, non-removable battery, no FM radio, speaker volume is low.

3. LG V20

The LG V20 is a mammoth phone with top specs and some distinguishing features when compared to Samsung and Google. It is a top-of-the-line phone, featuring Android 7.0 Nougat. Some of its specs don't quite match up

to Galaxy S7 Edge, though. The V20 is a metal smartphone with a secondary display, two rear cameras, and many features for music enthusiasts and people who love mobile photography.

Technical specifications

- 14.47cm (5.7 inches) IPS LCD capacitive touchscreen with 16 million colours and 513ppi
- Qualcomm MSM8996 Snapdragon 820 processor (2 x 2.15GHz Kryo + 2 x 1.6GHz Kryo), Adreno 530
- 4GB RAM
- Corning Gorilla Glass 4
- Secondary display--160 x 1040 pixels, 5.33cm (2.1 inches)
- 32GB/64GB with 256GB support (microSD card slot)
- Dual 16MP (rear) + 8MP (front) camera with laser auto-focus, optical image stabilisation, LED flash
- Fast charging
- Connectivity:** Wi-Fi 802.11 a/b/g/n/ac, dual-band, Wi-Fi direct, DLNA, hotspot, Bluetooth 4.2, A-GPS, GLONASS, NFS, infra-red, FM radio with RDS, USB Type C
- Sensors:** Fingerprint reader, accelerometer, gyroscope, proximity sensor, compass, colour spectrum
- 3200mAh removable battery

Pros and cons

Pros: Android 7.0 Nougat, durable metal body, loud audio, high quality camera, secondary display and

LG V20
