

removable battery.

Cons: Low USB transfer speed, difficult-to-use single handed, heavy software layer, limited battery life, not water resistant and the software needs overhauling.

4. Moto Z Force

Moto Z Force offers a modular design and delivers the same premium performance as a regular Moto Z but takes the smartphone specifications to the next level with a better battery, improved camera (especially low light photography), a better screen and much more. Moto Z Force surpasses the Droid Turbo 2 and Moto Z in terms of ergonomics, design and performance.

Technical specifications

- 13.97cm (5.5 inches) AMOLED screen with Quad HD display — 1440 x 2560, 535 ppi
- Qualcomm Snapdragon 820 – dual core 2.15GHz Kryo and dual core 1.6GHz Kryo, Adreno 530 4GB RAM
- Gorilla glass
- 32GB/64GB internal storage, 256GB support via memory card
- 21MP (rear) + 5MP (front) camera with laser and face detection auto-focus, optical image stabilisation, dual-LED flash
- **Connectivity:** Wi-Fi 802.11 a/b/g/n/ac, dual-band, Wi-Fi direct, Hotspot, Bluetooth 4.1, A-GPS, GLONASS, NFC, Type C USB
- **Sensors:** Fingerprint, accelerometer, gyroscope, proximity, compass and ambient light
- 3500mAh non-removable battery

Moto Z Force

Pros and cons

Pros: Fast performance, light design fantastic display, accurate and fast finger print scanner, excellent camera.

Cons: No USB cable bundled, no 3.5mm audio jack, limited battery life higher price.

5. OnePlus 3T

OnePlus is one of the fastest growing companies in the Android market of flagship phones. In a competitive market like India, it has surprisingly occupied one of the top spots. The OnePlus 3T is a vivid example of how far the smartphone has come in terms of craftsmanship. Everything looks beautiful and sleek on this phone.

OnePlus 3T is very comfortable to hold and the placement of every button is good. The OnePlus 3T is one of the phones that kickstarted a tough, competitive market for value-driven devices with high-end specs.

Technical specifications

- 13.97cm (5.5 inches) optically AMOLED display with full HD resolution with 401ppi
- Metal black body with Corning Gorilla Glass 4
- Snapdragon 821 SoC (2 x 2.35GHz + 2 x 1.6GHz) processor, Adreno 530 GPU
- 6GB LPDDR4 RAM
- 64GB/128GB fast UFS 2.0 storage
- 16 MP (rear) + 16 MP (front) camera with face detection auto-focus, optical image stabilisation, single LED flash, 2160p video @ 30fps
- **Connectivity:** 4G LTE, Wi-Fi 802.11 a/b/g/n/ac, Bluetooth 4.2, GPS, GLONASS, BDS, USB Type-C
- **Sensors:** Fingerprint scanner, hall sensor, accelerometer, gyroscope, proximity sensor, ambient light sensor, electronic compass
- 3400mAh (non-removable battery) with dash charge utility

Pros and cons

Pros: Metal unibody design, 4K video recording, dual SIM 4G LTE support, powerful processor, responsive fingerprint sensor, good battery life,

One Plus 3T

compatible with VR headsets, bright camera.

Cons: No FM radio or microSD card, non-removable battery.

6. Google Nexus 6P

The Google Nexus range of devices has become a standard with regard to configuration and performance. The Nexus 6P was the first of Google Android's premium phone offerings. The design of the Nexus 6P is a strong rival to the iPhone 6S Plus, Samsung Galaxy S7 and Note 7.

Technical specifications

- 14.47cm (5.7 inches) AMOLED capacitive touchscreen with 16 million colours, 1440 x 2560 pixels and 518ppi.
- 3GB LPDDR4 RAM
- Qualcomm Snapdragon 810 octa-core (4 x 1.55GHz Cortex A53 and 4 x 2GHz Cortex A57), Adreno 430 GPU
- 32GB/64GB/128GB internal storage
- 12.3MP (rear) + 8MP (front) camera with laser auto-focus, dual-LED flash, geo-tagging, touch focus, face detection, HDR, panorama
- **Connectivity:** Wi-Fi 802.11 a/b/g/n/ac 2x2 MIMO, dual-band, Bluetooth 4.2, NFC, GPS, GLONASS, digital compass, USB Type C
- **Sensors:** Fingerprint, accelerometer,
