

Google Nexus 6P

gyroscope, proximity, barometer

- 3450mAh non-removable battery

Pros and cons

Pros: Excellent display, speedy performance, decent camera, good battery life, responsive finger print scanner.

Cons: No microSD card slot, optical image stabilisation, wireless charging nor FM radio, and is expensive.

7. HTC 10

The HTC 10 is another great flagship Android phone of 2016, which flaunts next generation hardware. HTC fitted the phone with a 2K display, UltraPixel camera and a best-in-class audio quality. HTC 10 has a lightning fast performance compared to Huawei P9 and is regarded as the first phone to have optical image stabilisation in the front camera.

HTC 10

Technical specifications

- 13.2cm (5.2 inches) Quad HD Super LCD 5 capacitive touchscreen, 1440 x 2560 resolution, 564ppi
- 4GB LPDDR4 RAM
- Qualcomm Snapdragon 820 quad-core (2 x 2.15GHz Kryo and 2 x 1.6GHz Kryo) processor
- 32GB/64GB internal storage; expandable up to 256GB via microSD slot
- 12MP (rear) + 5MP (front) camera with optical image stabilisation, geo-tagging, laser auto-focus, flash
- **Connectivity:** Wi-Fi 802.11 a/b/g/n/ac, dual-band, Wi-Fi direct, DLNA, hotspot, Bluetooth 4.2, A-GPS, GLONASS, BDS, NFC, USB Type C
- **Sensors:** Fingerprint, accelerometer, gyroscope, proximity and compass
- 3000mAh non-removable battery

Pros and cons

Pros: Iconic design, good audio quality, UltraPixel camera with OIS at the front and back, fast charging.

Cons: Top mounted headphone jack, finicky laser auto-focus, lock button placement.

8. Xiaomi Mi Note 2

Xiaomi Mi Note 2 is a premium, luxurious smartphone with a curved glass and looks more like the Note 7. Another flagship phone by Xiaomi, it has glass on both sides, unlike the ceramic-backed Mi Mix, which makes the phone more prone to scratches. Excellent technical specifications and features ensure great performance.

Technical specifications:

- 14.47cm (5.7 inches) AMOLED capacitive touchscreen, 16 million colours, 1080 x 1920 resolution and 386ppi
- 4GB RAM/ 6GB RAM
- Qualcomm Snapdragon 821 quad-core processor (2 x 2.35GHz Kryo + 2 x 1.6GHz Kryo) processor, Adreno 530 GPU

Xiaomi Mi Note 2

- 64GB/128GB internal storage; no SD card slot
- 22.5 MP (rear) + 8 MP (front) camera with EIS (Gyro), face detection autofocus, dual-LED flash
- **Connectivity:** Wi-Fi 802.11 a/b/g/n/ac, dual-band, Wi-Fi direct, hotspot, Bluetooth 4.2, NFC, A-GPS, GLONASS, BDS, infra-red, USB Type C
- **Sensors:** Fingerprint, accelerometer, gyroscope, proximity, compass, barometer
- 4070mAh non-removable battery

Pros and cons

Pros: Overall camera and better performance, fast charging, optimised display for better viewing, dual SIM with VoLTE support, secure payments due to fingerprint scanner, IR sensor works like a universal remote.

Cons: No SD card slot, bulky, no FM radio.

9. Huawei P9

Huawei had a low profile in the Indian market last year. Its previous flagship phone was Huawei P8. After the launch of the Nexus 6P, Huawei launched the P9. While the phone's camera performance is good, its overall performance is not great due to shoddy software.

Technical specifications:

- 13.2cm (5.2 inches) IPS-NEO LCD capacitive touchscreen, 1080 x 1920 pixels, 16 million colours, 423ppi
- 3GB/4GB RAM
- HiSilicon Kirin 955 octa-core (4 x 2.5GHz Cortex-A72, 4 x 1.8GHz Cortex-A53) processor
- 32GB/64GB internal memory, expandable to 256GB via SD card slot
