Wireless Bluetooth headset for sports enthusiasts

Sony has launched its wireless Bluetooth headset, the NW-WS623, a model specially designed for sports enthusiasts. Weighing just 32 grams, the NW-WS623 has a battery life of up to 12 hours once fully charged. As per company claims, the device comes with the quick charge capability, charging the device for one hour of playback in just three minutes.

Enabled with NFC and Bluetooth, the device allows users to connect their headset to their smartphones or any other device. The NW-WS623 comes with 4GB built-in storage.

It has IP65/IP68 certification for water and dust resistance, making it suitable for use in outdoor sports activities. It can also endure extreme temperatures from -5 degrees to 45 degrees Celsius, allowing it to be used while hiking or climbing at high and very cold altitudes.

The device features an ergonomic, slim and light design, and comes with the ambient sound mode, enabling users to hear external sounds without having to take off the headset.

The Sony NW-WS623 is available in black colour via Sony Centres and other electronics retail stores.

Headphones with active noise cancellation from Sennheiser

German audio company Sennheiser has unveiled a pair of UC-certified headsets that employ adaptive active noise cancellation (AANC), called the MB 660 UC and MB 660 UC MS.

AANC muffles the background sounds to a certain extent offering a more pleasant user experience.

The headphones offer stereo audio and CD quality streaming with aptX. They come with Sennheiser's unique SpeakFocus technology, delivering crystal clear sound even in noisy offices or play areas. The headphones are designed with a touchpad to access controls like answer/end call, reject, hold, mute, redial, change track, volume, etc. The pillow soft leather ear pads and ear shaped cups are designed with premium quality material to ensure maximum comfort and style.

The MB 660 UC series provides up

Connect between the digital and analogue worlds with Electropen 4

Portable devices manufacturer, Portronics, has launched its latest digital pen, the Electropen 4, which allows users to write notes or make sketches on paper and then convert these into a document or JPEG image on their smartphone, laptop or computer.

The digital pen has an in-built Flash memory to store A4 sized pages and later sync or transfer these to the smartphone or tablet, eliminating the need to carry a mobile device or laptop to meetings for taking notes.

In addition, the Bluetooth digital pen uses the microphone of the smartphone via an app that allows users to record an audio clip while they take notes. The user can also erase or edit the notes taken
