

Figure 6: EditPad is very good with regular expressions

EditPad Lite

EditPad Lite is a general-purpose text editor. It can be used to easily edit any kind of plain text file. It displays content instantly because it uses pointers to access the file directly, rather than to read the entire file into memory at once. EditPad Lite has all the essential features to make text editing easy.

Key features

- Full Unicode support, including complex scripts and right-to-left scripts.
- It does editing of files directly in Windows, UNIX and Mac with text encoding (code pages) and line breaks.
- Working with multiple files is very easy using the tabbed interface.
- You can undo and redo all open files infinitely, even after you save the file.
- It supports large files and long lines very well.
- It prevents any data loss by automatic backup and saves working copies of files.
- Its powerful search-and-replace option with literal search terms is a worthy feature.
- Regular expressions that can span multiple lines.

Disadvantages

- It supports Windows only.
- It is only free for personal use.

EmEditor

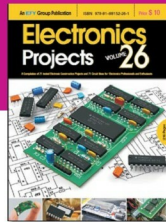

This is a powerful editor with some very great features like Unicode support and coloured syntax highlighting. It supports multi-platform files, and many files can be opened concurrently. It uses an effective approach to read large files as it spills the content onto the disk
