You can also plot the graph with the above feeds using the third party library, QCustomPlot (<http://www.qcustomplot.com>) or with the help of Qt Charts introduced in version 5.7.0.

As an example, we have discussed connectivity to ThingSpeak in this article. You can apply these concepts

to other IoT platforms and database servers like InfluxDb, which support HTTP REST based connectivity. You can find the entire code for this example at github.com/rajeshsola/qt-examples/tree/master/thingspeak-demo.
