

Portable LED projector from Asus

Price:
₹ 71,500

Taiwanese multinational computer hardware and electronics company, Asus, has launched its portable LED projector, the Asus P3B. The device offers a comfortable big screen experience for both home and work environments with its light weight, and sleek and compact design.

The projector sports a metal body and is similar in size to a CD

holder bag. The easy-to-set-up projector features 12 physical buttons (including the power button) to adjust everything from screen size to brightness and volume, and a dial that allows the user to adjust the sharpness of the screen.

It comes with a protective lid to cover the lens; the bottom of the device has a kickstand and rubberised edges to protect the projector from slipping. A small screw at the bottom makes it easy to mount the projector on a tripod.

The device sports different connectivity ports and slots including HDMI, MHL, VGA, USB

2.0, microSD and microUSB for connecting devices and charging other gadgets as well.

With a 800 lumen light output and 100 per cent NTSC colour gamut, the projector delivers a sharp output at up to 1280x800 pixel resolution.

It comes with a 12,000mAh battery that manages to deliver about three hours of projection after a single charge. It can also function as a power bank to charge devices like smartphones and tablets. With built-in speakers, the device offers a pretty great audio experience.

The Asus P3B portable LED projector comes in a white and silver colour combination, and is available via Amazon and retail stores.

Noise cancelling headphones from Sony

Japanese tech giant Sony has launched its active noise cancelling headphones—the MDR-1000X.

The Bluetooth enabled headphones let the user wirelessly connect to smartphones and other devices for a convenient listening experience. Other advanced features include the personal NC optimiser function, which is said to analyse the shape of the head and the way the headphones are worn in order to ensure ideal noise cancellation.

The built-in DSEE HX upscaling supposedly improves sound quality

on compressed audio files like MP3, ACC, ATRAC and WMA. Company sources claim that the headphones offer a 20-hour battery life while using Bluetooth and active noise cancellation.

The headphones are packed with a cable for wired connectivity, an airline adapter and leather carry case. They are powered by 40mm drivers and have a frequency response range of 4-40,000Hz.

The Sony MDR-1000X is available in black and beige via Amazon.
