

EFY CONFERENCES

India's Mega Tech Conference

EFY Conferences (EFYCON) started as a tiny 900-footfall community conference in 2012, going by the name of Electronics Rocks. Within four years it grew into "India's largest, most exciting engineering conference," and was awarded as the most important IoT global event in 2016 by Postscapes.

In 2017, 11 independent conferences on IOT, Artificial Intelligence, Cyber Security, Data Analytics, Cloud Technologies, LED Lighting, SMT Manufacturing, PCB Manufacturing, etc were held together in 3 days, as part of EFY Conferences.

Key Themes of Conferences

& Workshops in 2018

- Profit from IoT: How can suppliers make money and customers save money using IoT
- IT & Telecom Tech Trends Enabling IoT Development
- Electronics Tech Trends Enabling IoT Development
- Artificial Intelligence and IoT
- Cyber-security and IoT
- Latest Trends in Test & Measurement Equipment
- What's New in Desktop Manufacturing
- The Latest in Rapid Prototyping & Production Equipment

Who Should Attend?

- Investors & Entrepreneurs in Tech
- Technical Decision Makers & Influencers
- R&D Professionals
- Design Engineers
- IOT Solution Developers
- System Integrators
- IT Managers

SPECIAL PACKAGES FOR

- Academicians • Defence Personnel
- Bulk/Group Bookings

Reasons Why You Should NOT Attend IEW 2018

We spoke to few members of the tech community to understand why they did not attend past editions of India Electronics Week (IEW). Our aim was to identify the most common reasons and share them with you, so that if you too had similar reasons, you may choose not to attend IEW 2018. This is what they shared...

#1. Technologies like IOT, AI, Embedded Systems Have No Future

Frankly, I have NO interest in new technologies like Internet of Things (IoT), Artificial Intelligence, etc. I don't think these will ever take off, or become critical enough to affect my organization or my career.

#2. I See No Point in Attending Tech Events

What's the point in investing energy and resources to attend tech events? I would rather wait and watch—let others take the lead. Why take the initiative to understand new technologies, their impact and business models—beats me.

#3. My Boss Does Not Like Me

My boss is not fond of me and doesn't really want me to grow professionally. And when she came to know that IEW 2018 is an event that can help me advance my career, she cancelled my application to attend it. Thankfully, she is attending the event! Look forward to a holiday at work.

#4. I Hate Innovators

Oh my! Indian start-ups are planning to give LIVE demonstrations at IEW 2018. I find that hard to believe. Worse, if my boss sees these, he will expect me to create innovative stuff too. I better find a way to keep him from attending.

#5. I Am Way Too BUSY

I am just too busy with my ongoing projects. They just don't seem to be getting over. Once I catch up, I'll invest some time in enhancing my knowledge and skills, and figure out how to meet my deadlines.

#6. I Like Vendor Events

Can you imagine an event where most

of the speakers are not vendors? Where most talks will not be by people trying to sell their products? How boring! I can't imagine why anyone would want to attend such an event. I love sales talks, and I am sure everybody else does too. So IEW is a big 'no-no' for me.

#7. I Don't Need Hands-on Knowledge

I don't see any value in tech workshops being organised at IEW. Why would anyone want hands-on knowledge? Isn't browsing the Net and watching YouTube videos a better alternative?

#8. I Love My Office

Why do people leave the comfort of their office, and weave through that terrible traffic to attend a technical event? They must be crazy. What's the big deal in listening to experts or networking with peers? I'd rather enjoy the coffee and the cool comfort of my office, and learn everything by browsing the Net!

#9. I Prefer Foreign Events

While IEW's IOTshow.in was voted as World's #1 IOT event on Postscapes.com, I don't see much value in attending an event in India—and that, too, put together by an Indian organizer. Naah! I would rather attend one in Europe or an event organized by foreigners.

Hope we've managed to convince you to NOT to attend IEW 2018. Frankly, we too, have NO clue why 10,000-plus techies attended IEW in March 2017. Perhaps there's something about the event that we've not figured out yet. But, if we haven't been able to dissuade you from attending IEW 2018, then you may register at <http://register.efy.in>.
