- To get the SBOM of platform-specific container images such as `linux/arm64`, `arm64`, etc, use the *platform* flag:

```
docker sbom nginx:alpine --platform linux/arm64
```

- To get the SBOM report in different SBOM formats such as spdx-json, cyclonedx-json, syft-json, etc, use the *format* flag:

```
docker sbom oshi36/nodeapp_test:latest -format sdx-json
```

In this format, a unique identifier `SPDXID` is provided for each package and file, along with information about the licence:

```
{
  "SPDXID": "SPDXRef-DOCUMENT",
  "name": "oshi36/nodeapp_test-latest",
  "spdxVersion": "SPDX-2.2",
  "creationInfo": {
    "created": "2022-12-06T07:40:44.279888063Z",
```

```

"creators": [
