

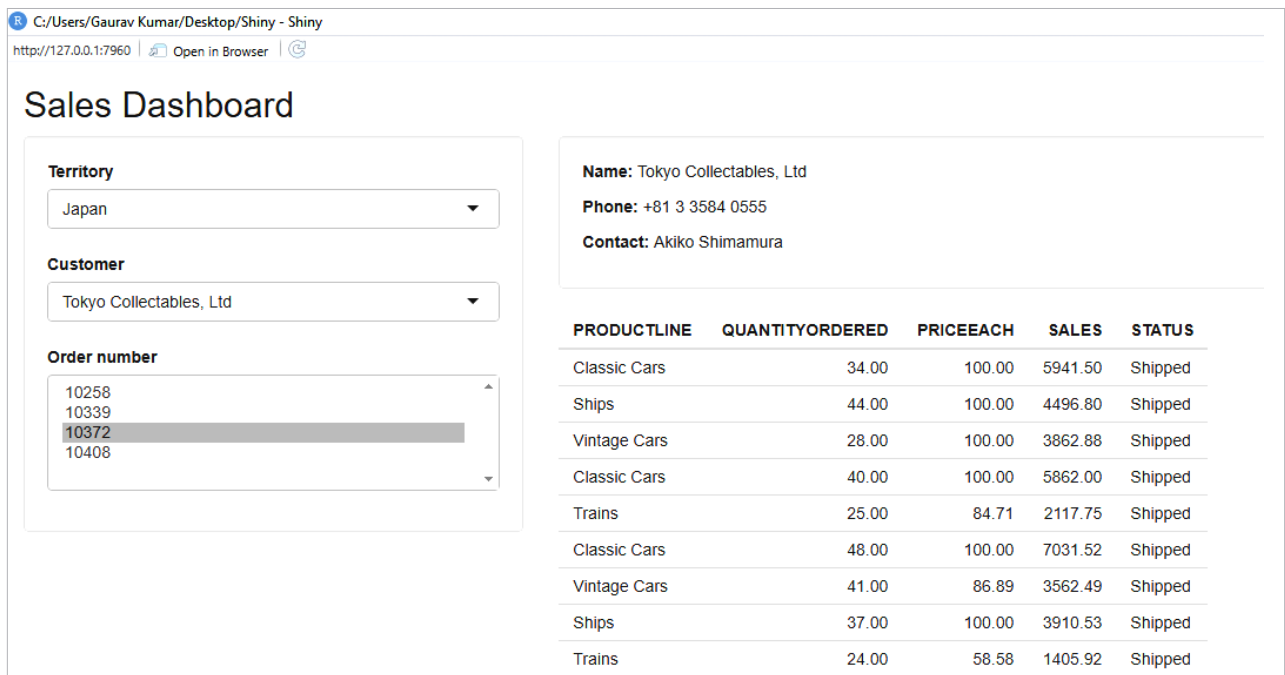

Figure 3: Sales dashboard with multiple controls

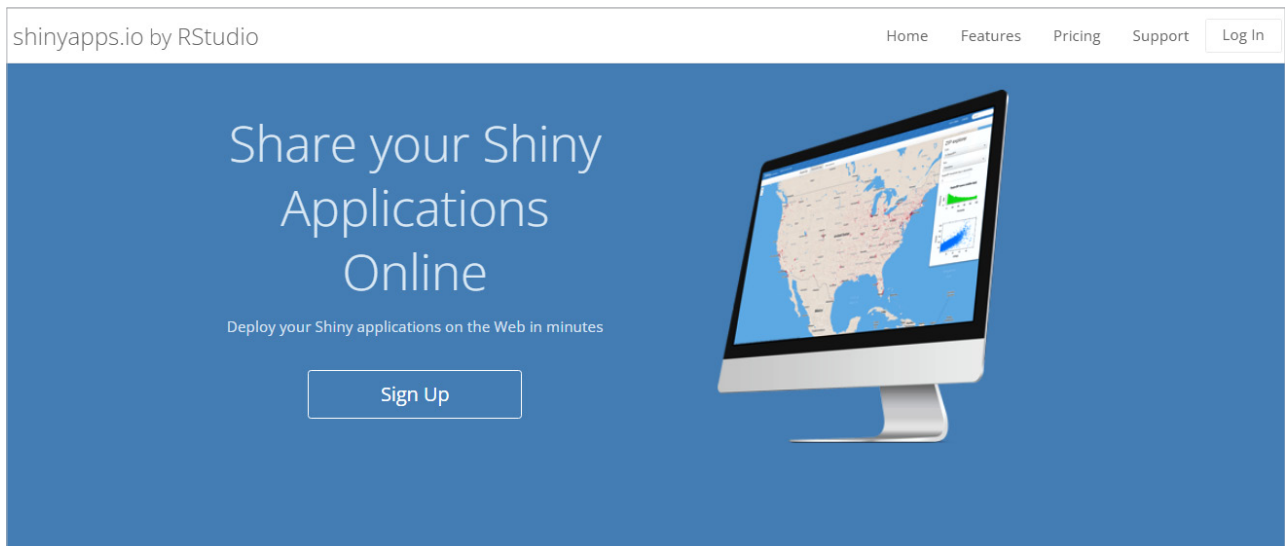

Figure 4: Cloud for hosting and deployment of Shiny app

On running the code of the Shiny app, the output shown in Figure 3 is generated which can be viewed on any web browser. The sales dashboard has multiple controls and is quite interactive with different user interface modules.

With the use of Shiny cloud, this app can be deployed and hosted on the cloud for anytime anywhere availability on the internet.

The free variant of Shiny cloud allows five applications to be deployed within 25 active hours.

Researchers and data scientists can develop user-friendly apps driven with real-time data using the Shiny library of R. This library can also be used for deploying their machine learning apps on web platforms. **END** 🐧
