

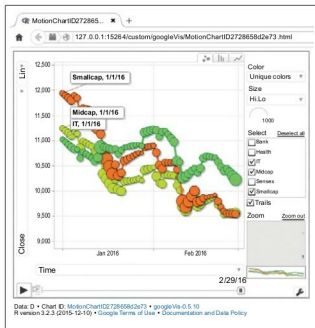

Figure 3: After zooming in, a chart showing some trails of the movement of bubbles

click on the *Play* option, the values and bubble sizes will change with time.

Change the x-axis column to *Date*, the y-axis column to *Closing* and colours to *Unique*. Select *Bank*, *IT* and *Sensex* indices for showing the trails. You can see the results in Figure 2.

You may notice that the values of some of the indices are too close to each other to be viewed effectively. The chart has the option to select an area and zoom in, as you can see in Figure 3.

The range of data sets available in the public domain is increasing, some of which you may explore on <https://www.google.com/publicdata/>. The data made available by various government departments in India is available through <https://data.gov.in/>. Visualisation tools like the one discussed above help you make sense of it all. **END**
