the Magit buffer. A screenshot is provided in Figure 3.

You can make changes to the project sources and stage them to the index using the 's' shortcut. You can unstage the changes using the 'u' shortcut. After making changes to a file, you need to use *M-x magit-status* to update the Magit buffer status.

A sample screenshot of the modified files and staged changes is shown in Figure 4.

You can hit *TAB* and *Shift-TAB* to cycle through the different sections in the Magit buffer. To commit a message, press 'c' followed by 'c'. It will pop up a buffer where you
