Innovative Bluetooth headphones from Creative

Creative, the maker of digital entertainment products, has unveiled its latest Bluetooth over-the-head headphones, named 'Outlier', which are crafted from durable material with a flexible headband. The ear cushions are made from soft-protein leatherette that allows them to be worn all day, with comfort.

Targeted at urban commuters and fitness enthusiasts, the headphones come with six pairs of interchangeable colour rings, allowing for 30 customised colour combinations. Weighing just 93 grams, they are equipped with a built-in MP3 player, enabling users to insert a microSD card and use them without a paired smartphone.

The headphones' audio is powered by 32mm neodymium dynamic drivers, and a 'Buddy' app can be installed to read out the messages received from paired Android devices. They also feature NFC connectivity for quick Bluetooth pairing with supported devices, along with lossless USB audio playback in order to charge the device while playing music.

Price:
₹ 4,881

The headphones include a 3.55mm audio-in socket, which lets users connect them with a typical stereo cable or any source equipment. Bluetooth v4.1 technology supports the MP3, WMA and WAV formats.

The company claims that the headphones offer 10 hours of uninterrupted music on a full charge.

The Creative Outlier is available via amazon.in.
