Sony's pocket-sized projector for smartphones

Sony recently unveiled its portable projector for smartphones, namely, the MP CL1.

The pocket-sized projector comes encased in an aluminium body with a matte finish and weighs around 210 grams. It uses a laser light source and offers full HD resolution images with a contrast ratio of 80,000:1, at an aspect ratio of 16:9 and maximum brightness of 32 ANSI lumens.

The MP CL1 is a short-throw mobile projector capable of displaying a screen size of up to 304.8cm (120 inches) at a distance of 3.45 metres. It offers several connectivity options, including HDMI or MHL.

The projector features built-in screen mirroring that allows users to mirror content via Wi-Fi. It's suited for business presentations or home entertainment, as it comes with a built-in speaker for displaying content from smartphones and tablets.

Price:
₹ 45,999

The projector uses Sony's laser beam scanning technology, which enables focus-free projection and does not require even surfaces. According to company sources, the Sony MP CL1 lasts for up to 120 minutes on HD resolution playback with a built-in 3,400mAh battery. It is available via amazon.in.

High capacity compact SSD from Samsung

Samsung has launched its latest solid-state drive (SSD) — the T3. Similar to the previously launched T1, the new T3 looks like a slightly thicker credit card and weighs around 51 grams.

The drive sports a dark silver coloured metal body with a black design and anti-scratch urethane coating, which gives it a premium look. It is powered by Samsung's proprietary Vertical NAND (V-NAND) and SSD TurboWrite technology.

The SSD offers sequential read/write speeds of up to 450 megabytes per second (MB/s) with a USB 3.0 super speed interface, along with AES 256-bit hardware encryption. It has a shock-resistant internal frame, which can withstand an accidental drop from up to 2 metres, along with a thermal guard to manage workload and prevent the device from overheating.

Price:
₹ 10,999 for 250GB,
₹ 18,999 for 500GB,
₹ 37,999 for 1TB and
₹ 74,999 for 2TB

The T3 SSD is compatible with a wide range of USB supported devices, including the latest Android smartphones, tablets, etc. It uses the exFAT file system so that users need not reformat while using the drive with different computers.

The Samsung T3 SSD is available in 250GB, 500GB, 1TB and 2TB variants across all leading online and retail stores.
