

PHD Chamber of Commerce and Industry organises national conference on cyber security along with DeitY

PHD Chamber of Commerce and Industry recently partnered with the Department of Electronics and Information Technology (DeitY) to host a national conference on cyber security.

The conference, called 'Cyberix 2016 — Securing Digital India', was held at the PHD House in New Delhi, and was aimed at understanding the changing facets of cyber threats and its impact on vital installations and businesses.

The conference was inaugurated by the guest of honour, Brig. M.U. Nair, DACIDS, DIARA, Indian Army. During the event, there was a special address by R.K. Sudhanshu, joint secretary — cyber laws and e-security, DeitY, government of India. The president of the PHD Chamber of Commerce and Industry, Gopal Jiwarajka, said in his welcome address that India has over 460 million Internet users and with such high numbers, there has been a corresponding rise in cyber crime over the past few years. He said that although the Internet increases communication, it can also increase the incidence of cyber threats, which is evident by the fact that India ranks fifth in online payment hacking.

Cyber security has never been more important for governments and businesses across the globe than it is today. Its scope ranges from detecting and anticipating cyber attacks on key defence installations to preventing corporate hacking attacks. Jiwarajka also said that there is a huge demand for security solutions and services to protect the confidential data of the government and the military, apart from public data, the banking financial service and insurance (BFSI) sector, data and data of hospitals.

Jiwarajka also expressed concern about the cyber security talent gap and the lack of awareness about available dedicated solutions. He attributed these factors as the biggest challenges being faced by the industry.

In his special address, Sudhanshu said that DeitY is contemplating amendments to the existing Indian cyber laws to align them with the prevailing realities of modern times as well as bringing about new encryption and privacy policies to cater to the evolving cyberspace. He also mentioned that there is a need for basic education regarding cyber security at all levels of the present education system in the country.

The conference was conducted along with associate partners including CMAI, TEMA and CIO Klub. The EFY Group, the parent company of *Open Source For You*, was among its media partners.

Tata Consultancy Services hosts Open Source Convention 2016 in Mumbai

Tata Consultancy Services (TCS) recently hosted the Open Source Convention 2016 in Mumbai — an annual event that highlights TCS' thought leadership in the world of open source and offers a hands-on experience on open source technologies.

The day-long Open Source Convention 2016 witnessed eminent speakers from all across India sharing their thoughts and experiences. The event was conducted with the theme of 'Interoperability' to let its customers enable enterprise-level interoperability using open source solutions.

"Relevant and with enough pointers to influence roadmaps and future decisions," said the CTO of a leading Indian financial solutions company, about the convention. Another CTO stated that the convention provided practical insights to open source technology adoption.

The event was well attended by customers including CIOs and CTOs of top companies in the country. It brought about fruitful opportunities for the attendees to interact directly with thought leaders, and know more about the latest developments in the open source arena.
