

## Putting Data at the Heart of the Business

At Big Data, Analytics & Insights Summit, we showcase Big Data use cases and techniques that drive the greatest business value. With an emphasis on real-life implementation of Big Data technologies, this practical business forum will provide bold vision from leading innovators across the data-driven spectrum. We explore the latest tools and trends to help delegates gain fresh insights and strategic momentum to grow and respond to their business requirements. Join a select group of professionals, business strategists, BI professionals and data scientists looking to leverage the data opportunity for competitive advantage.

### DISCUSSION THEMES

- Predictive Analytics: Staying One Step Ahead of the Connected Customer
- Big Data in the Age of the Customer
