

Key workshops @ OSI Days 2015

Drupal 8 in a Day

This workshop allowed the attendees to get a thorough introduction to Drupal 8 in one day. Jacob Singh, country head, Acquia, India, talked about the most essential features and concepts of Drupal while taking his audience through a series of hands-on activities. Attendees got an opportunity to get familiar with Drupal terminology and identify how Drupal sites are constructed.

Software Architecture: Principles, Patterns and Practices

This workshop introduced developers and designers to key topics in software architecture including architectural principles, constraints, non-functional requirements (NFRs), architectural styles and design patterns, viewpoints and perspectives, and architecture tools. A special feature of this workshop was that it covered examples and case studies from open source applications.

Shifting to Functional Programming: Lambdas for Java Developers

Functional programming is on the rise. Almost all major and mainstream languages support functional programming features, including C++, Java, Swift, Python and Visual Basic. With Java 8's lambda functions, Java now supports functional programming. Moving to functional programming can result in significantly

better code and productivity gains. However, it requires a paradigm shift — you need to move away from imperative and object-oriented thinking to start thinking functionally. That's what this workshop helped achieve. It helped the attendees make this shift towards functional programming. The workshop introduced lambda functions in Java with examples from the Java library itself.

IoT: An Introduction and Getting Started

IoT is an evolving field. The purpose of the workshop was to present a current technological snapshot. The architectures, protocols, processors as well as sensors and actuators in use today were looked into. Free source development tools introduced in an earlier lecture were further discussed in the context of the overall ecosystem.

A simple demo application and its development was taken up to illustrate the typical development process.

Getting your Hands Dirty with the DevOps Tool Chain

This workshop targeted developers or system admins, who longed to try their hands at the DevOps tool chain. It introduced the attendees to the approach for managing infrastructure as a code.

Tizen Web App Development – a Hands-on Session

This workshop included an introduction to the Tizen SDK/IDE and tools – a hands-on session to develop a simple Web application and showcase the sample code usage of multimedia and location APIs.

Key tracks@ OSI Days 2015

FOSS for Everyone

This half-day track comprised multiple sessions on the use of FOSS and covered some interesting topics including transforming customer engagement with open source DBMS, open source licensing in the cloud age, innovation with open source adoption, IBM's relationship with open source that spans decades, etc.

The Cloud

This was a half-day track with multiple sessions on how to choose the best cloud solution and the latest developments in cloud solutions. Topics covered in this track included: 'DevOps – The New Paradigm in Business IT, Powered by Open Source', 'Simplified Multi-cloud Management', 'IBM Bluemix and Docker Containers', 'Redefine Your Cloud Storage with OpenSource' and 'Architecting the Cloud Journey'.

Mobile App Development

This half-day track had multiple sessions on what's hot on the mobile development front. Some of the topics covered in the track included 'The Open Source Tizen Platform and Smartphones', 'Grommet – The UX Framework for Enterprise Applications',

'Mobile DevOps: What, Why and How?' and 'Cross Platform Mobile Analytics with Mobile Engagement'.

IT Infrastructure

In this half-day track the audience met the experts in IT infrastructure management. Topics included 'Manage the IT Infrastructure Effectively', 'Building the Enterprise Ecosystem with Oracle: Oracle Linux', 'Building Enterprise Applications with Asterisk' and 'Provisioning of Hadoop on Hyper Converged Infrastructure.'

Success Stories

Open source has helped organisations save a lot of money. This full-day track had IT decision-makers share their success stories with open source. Some of the key speakers in the track included Ashwin Khorana, CTO, Kotak Bank; Srijon Biswas, Flipkart; Anoop Menon, CTO, RedBus; Piyush Jha, AVP, product engineering, CSM, GlobalLogic; and Susheel Zaveri, CTO, 24X7.
