- users using the *Now on Tap* feature, with which they can get help by holding down the *Home* button without needing to leave their app or website.
- Improved voice API:** More voice based assistance has been added to this release, with which you can direct an app to open specific sites or genres of music, e.g., Tune-in, Raaga, etc.
- Advanced battery features**
 - Doze:** This new feature puts your device in a sleep state when it's at rest. This automatically improves battery life.
 - App standby feature:** This helps ensure that seldom used apps don't drain the battery.

Android security

- As for any device in the cyber world, security is a paramount feature. Verified boot provides this by ensuring the Android OS is running the right firmware revision without any modification.
- Apps installed from Google Play Store will ask permission only if needed. Users still have permission to allow/ deny access for an app.

Android usability and productivity, and system usability

- This feature has improved app performance and lowered memory overhead, which in turn has made for better

multitasking performance.

- Smartened up text selection makes it simpler to undo/redo.
- It enables easy toggling for the *Do Not Disturb* mode.
- Connectivity for work**
 - During set-up, you can now add personal and corporate email addresses for setting up an account in your device.
 - There is improved access for VPN connectivity.

Apart from an improved UI, contextually aware features and battery saving options, Marshmallow comes with a whole range of other tweaks that has made this Android 6.0 even easier to use than its predecessors. **END**
