5. Locate the file that you have recently downloaded.
6. Once your APK is successfully uploaded, you will see the message 'Upload successful' and will be prompted to prepare store listings.
7. As already mentioned, store listings will be additional stuff that will define your application in more detail.
8. You will be asked to write a text description of your application, for which you need to upload some graphics (photos/videos).
9. You need to answer the questionnaire, which will make sure that your app doesn't have any content that violates the terms of your agreement and that it is safe to upload.
10. In the pricing tab, decide and set the price for your application. You can make your app free or you can set some fee.
11. You are eligible to get 70 per cent of the price set for your application, and

- the remaining 30 per cent is credited to Google for providing the service.
12. Keep checking the button on the top right corner which states 'Ready to publish', once everything required has been provided by you.
13. Click on the 'Publish' button and your dashboard will list your recently uploaded application.
14. It takes three to four hours for your application to be available in Play Store.
15. Once it is available, you can share the

A note to readers: I would like to know more about your ideas on making Android applications. If you have anything specific that you would want me to cover, then please write to me via email. I will certainly try to help you convert your idea into a working application.
