

Panasonic launches two headphones

Japanese electronics company, Panasonic, recently released two new models of headphones, the Panasonic HD5 and BTD5, in India.

The HD5 features a 40mm HD audio driver unit that delivers high resolution audio. It is capable of reproducing even a subtle detail of one single instrument. The headphones feature a proprietary horizontal slide adjustment technique, which allows users to shift the position of the drivers to suit individual comfort levels. They are also equipped with an anti-vibration driver frame to minimise unwanted vibration.

The Panasonic BTD5, on the other hand, is a Bluetooth headphone, which comes with NFC technology for convenient connectivity and clear sound, along with NDC support.

The BTD5 also comes with 40mm Neodymium drivers and a Li-ion battery that can deliver high quality music

playback for up to 40 hours.

The device is also equipped with a built-in microphone and has touch controls for navigation. The touch controls are designed into the ear pad housing to enable users to turn Bluetooth on or off, change tracks or adjust the volume easily.

Both the models, the HD5 and BTD5, come with clear and dynamic bass sound, and are available online and at retail stores.

Affordable netbooks from DataWind

Canada based DataWind has launched two new low-cost netbooks in India — the DroidSurfer 10 and 7. These 25.6cm and 17.7cm (10.1 inch and 7 inch) tablets come with a front-facing camera. Both the devices run on the Android 4.4.2 OS and have tactile responsive keyboards.

The DroidSurfer 10 and 7 come with 8GB and 4GB internal memory, respectively. They offer flexibility between work and play with a decent battery life. On the connectivity front, the devices are enabled with a Wi-Fi hotspot, Wi-Fi Direct and support for external drives.

Both the gadgets come bundled with free unlimited Internet browsing for one year for those with Reliance and Telenor connections (on prepaid SIM cards).

The DroidSurfer 10 and 7 are available via retail distributors all over India.

High capacity portable charger from Portronics

Portable devices manufacturer, Portronics Pvt Ltd, has launched its latest portable charger, namely, Velocity. The company claims it fulfils nearly all the charging requirements of various kinds of devices.

Velocity comes with a dual USB port with output 1.0A configuration and 2.1A configuration, which enables users to charge two mobile phones or any other devices simultaneously. The 1.0A configuration gives DC 5.0V-1A and the 2.1A configuration offers DC 5.0V-2.1A.

With a formidable 10400mAh battery capacity, users can fully charge their 2000mAh (or higher capacity) devices multiple times. The device is capable of automatically adjusting its output level based on the device or devices that are connected to it. It features a built-in LED light to show the device's battery status.

The easy-to-carry portable charger is highly compatible with almost all the smartphones and tablet brands from Apple, Samsung, HTC, BlackBerry, Google, etc, the company claims. It is available in black and gold variants at the company's website and via online retailers.
