

```
- [X] Read book
- [X] Take print-out
* Recreation [50%]
- [X] Read newspaper
- [ ] Meditate
```

If a task is completed, you can move it out of the Org file using `C-c C-x C-a`. This will create an archive file with the completed items.

Planner

An Org-mode file can be used as a planner. Each task can be marked with any of the following states - *{TODO, DONE}* using the `C-c C-t` key combination. For example:

```
* TODO College...
* DONE Home [2/2]...
* Recreation [50%]...
```

You can also customise the *TODO* states depending on your workflow by setting *org-todo-keywords* in your Emacs startup file. For example:

```
(setq org-todo-keywords
'((sequence "TODO(t)" "NEXT(n)" "STARTED(s)" "WAITING(w)"
"| " "DONE(d)" "CANCELED(c)")))
```

The tasks can be scheduled using `C-c C-s`. A date is prompted for using the *Calendar* and is placed below the list entry. For example:

```
* TODO College
* Assignments
* Lab
  SCHEDULED: <2016-04-06 Wed>
  1. Compiler Design
  2. Programming Languages
* Exams...
```

You can also add a time interval during which you intend to complete the task. The above example with a scheduled time is shown below:

```
* TODO College
* Assignments
* Lab
  SCHEDULED: <2016-04-06 Wed 14:00-16:00>
  1. Compiler Design
  2. Programming Languages
* Exams...
```

A deadline can be added to a task using the `C-c C-d`

shortcut. An example is given below:

```
* TODO College
* Assignments
* Lab...
* Exams
  DEADLINE: <2016-04-08 Fri>
  - Mathematics
  - Operating Systems
  - Databases
  - Compilers
* DONE Home [2/2]...
* Recreation [50%]...
```

You can have multiple Org files stored in your system, and you can instruct GNU Emacs where to find them by setting *org-agenda-files* in your Emacs startup file as shown below:

```
(setq org-agenda-files (quote ("/tmp")))
```

Additionally, if you want an agenda view to see the scheduled items and deadlines, add the following to your GNU Emacs startup init file:

```
(define-key global-map "\C-ca" 'org-agenda)]
```

In the Org file, when you press `C-c a`, the following agenda will show up in a new buffer:

```
Week-agenda (W14):
Monday 4 April 2016 W14
  test: In 4 d.: Exams
Tuesday 5 April 2016
Wednesday 6 April 2016
  test: 14:00-16:00 Scheduled: Lab
Thursday 7 April 2016
Friday 8 April 2016
  test: Deadline: Exams
Saturday 9 April 2016
Sunday 10 April 2016
```

Tables

Org-mode has a built-in table editor which neatly aligns the column data. For example:

```
* TODO College...
* DONE Home [2/2]...
* Recreation [50%]
- [X] Read newspaper
- [ ] Meditate

| Day | Time | Status |
|-----|-----|
| Monday | 1.25 | Done |
```
