Hyperledger Fabric: Building a Private Blockchain

Hyperledger Fabric is a blockchain framework used in production by companies like Walmart and Maersk. This tutorial will help you set up a complete Fabric network on a Windows 11 laptop using Docker and WSL 2... [Read more on page.....53](#)

Why Decentralised Identity is the Security Bedrock for Agentic AI

As AI agents begin to act on behalf of executives (signing contracts, moving funds), how do we verify their identity? In the framework proposed here, open source decentralised identifiers act as the 'passport' for AI agents, ensuring every autonomous action is cryptographically signed and authorised.... [Read more on page.....58](#)

Blockchain: The Tech for Telecom

Blockchain applications are moving beyond finance and money to radio waves, IoT, and a range of telecommunications.
