Harman launches wearable wireless speaker

Harman International, owned by Samsung, has launched a wearable Bluetooth speaker from JBL – the JBL Soundgear. This device is worn around the neck for a handsfree and ear-free listening experience. The device can be easily connected to any Android or Apple smartphone or tablet, and can also be used with mobile virtual reality headsets. It is built with a dual-microphone conferencing system with noise cancelling technology, which ensures sound clarity, and comes with an echo cancelling microphone.

The speaker is designed with an anti-slip rubber, to keep it safe even during rigorous movement.

Weighing about 350 grams, the device packs an 800mAh battery which offers six hours of playtime.

Overall, the speaker allows users to create their own personal sound zone while going about their day-to-days tasks, yet without the closed-off feeling of a headphone.

The Harman JBL Soundgear is available for purchase from Harman's e-commerce platform and at other online and offline dealers across the country.

E-sports monitor from BenQ launched in India

Taiwan based BenQ's e-sports brand Zowie has launched the XL2411P monitor in India. This monitor has all the features of the classic XL2411 monitor, with an added display port connector for enhanced connectivity and colour vibrancy, which can be fine-tuned as per personal preference.

The monitor offers a resolution of 1920 x 1080 pixels at 144Hz (DVI-DL, DP) with an LCD screen size of 60.9cm (24 inches) and aspect ratio of 16:9.

The display port allows the monitor to be used with graphics cards without a DVI connection. With a 1ms response time, the monitor comes with a 144Hz refresh rate and delivers a smooth gaming experience for FPS (first-

person shooter) and MOBA (multi-player online battle arena) games. Additionally, the device offers BenQ's Black eQualizer for visual clarity in dark scenes, display mode and smart scaling for quick screen size adjustment.

A specially designed frame of the monitor minimises visual distractions; it offers low blue light and flicker-free technology for reduced eye strain, and comes with a height-adjustable stand for improved ergonomics. Available with a variety of input connectors, including DisplayPort, DVI-DL, HDMI and a headphone jack, the Zowie XL2411P monitor can be purchased via online portals and selected outlets.
