

Industrial grade switches from D-Link

Price:
On request

D-Link, a global manufacturer of networking devices, has launched industrial grade switches to address the growing networking demands of large industries. The switches are available in four variants – DGS-F3400, DGS-F3600, DESF3200 and DGS-F3000.

Designed to operate in extreme weather conditions, the switches are best suited for the challenging needs of the oil and gas, mining, manufacturing and shipping industries. They are shock and vibration resistant, offering high redundancy and reliability.

They are also equipped with advanced security features like MAC, storm control and IGMP snooping.

The PoE-ready switches are capable of supplying up to 30W of power per port to connected PoE enabled devices, which reduces deployment times and cable clutter, while eliminating the need for dedicated power supplies.

Backed by a reliable service support infrastructure, these switches are available via D-Link's extensive network of national distributors and systems integrators.

Address: D-Link India Limited, 408, Ashok Bhawan Building, No. 93, Nehru Place, New Delhi 110019

Gigabit Ethernet Lite-managed PoE+ switch from DIGISOL

DIGISOL, a subsidiary of Smartlink Holdings Ltd, has announced the availability of its new 24-port Gigabit Ethernet Lite-managed PoE+ switch – the DG-GS1528HP. This intelligent network-manageable switch is designed for network environments that require high performance, high port density and easy installation.

The entry level managed switch supports VLAN, port mirroring, port trunking and comes with a 56Gbps switching capacity. The wire-speed switching performance helps take complete advantage of the existing high performance of PCs and laptops by improving the responsiveness of applications and file transfer times. The switch comes with four Gigabit SFP ports for high speed uplinks to servers and backbones.

With the IEEE 802.1w rapid spanning tree protocol, the device provides a loop-free network and redundant links to the core network with rapid convergence. This ensures faster recovery from failed links, enhancing overall network stability and reliability.

The device also comes with the IEEE802.3ad Link Aggregation Control Protocol (LACP) to increase bandwidth by automatically aggregating several physical links together, and providing load balancing and fault tolerance for uplink connections.

The switch provides 24 x 10/100/1000 Base-T Ethernet PoE+ ports and 4 Gigabit SFP ports along with a user friendly Web interface, which facilitates ease of management.

Address: DIGISOL Systems Ltd, 215, Atrium Building, 2nd Floor, B Wing, Courtyard Marriot Compound, Andheri Kurla Road, Andheri East, Mumbai 400093
