Figure 5: Monit Nginx

```
group nginx
include /etc/monit/templates/rootbin
```

```
- name: Restart monit service
systemd:
  name: monit.service
  state: restarted
```

The above playbook can be invoked as follows:

```
$ ansible-playbook -i inventory/kvm/inventory playbooks/configuration/monit.yml
--tags nginx -vv -K
```

The Monit home page now contains the status of the system, the SSH daemon and the Nginx Web server, as shown in Figure 3.

Clicking on the 'sshd' or 'nginx' link on the Monit home page provides a more detailed status page, as shown in Figures 4 and 5, respectively.

You are encouraged to read the Monit manual at <https://mmonit.com/monit/documentation/monit.html> to learn more about its options and usage.
