

AI powered smartphone launched in India

Multinational network and telecommunications company, Huawei, has introduced its first ever AI enabled smartphone in India – the HonorView10.

The highlight of the bezel less smartphone is its AI enabled powerful Kirin 970 chipset that is packed with a neural network processing unit (NPU), enabling the device to perform extremely well. The smartphone has a 14.9cm (5.9 inch) full view display, and the device is embedded with many new AI applications that recognise various scenes while taking pictures.

With AI accelerated Microsoft Translator software, the smartphone can translate into different languages even without an Internet connection. The device is also capable of optimising performance as per a user's behaviour and requirements.

For enhancing the mobile gaming experience, the smartphone comes embedded with a gaming suite.

The new Kirin 970 chipset features an octa-core ARM Cortex CPU and a Mali-G72 12-core GPU, and runs on Android 8.0 Oreo. The smartphone comes with 6GB RAM and 128GB ROM, which is further expandable up

to 256GB via microSD card. On the camera front, the smartphone sports a 20MP + 16MP dual-lens camera on the rear and a 13MP front camera. Along with the 5V/4.5A Honor Supercharge feature, the device is backed with a 3,750mAh battery.

The Huawei Honor10 is available exclusively at Amazon.in.

16-port Gigabit Ethernet unmanaged switch from Digisol

Digisol, a subsidiary of Smartlink Network Systems, has recently made available its latest, compact Gigabit Ethernet unmanaged desktop version switch—the DG-GS1016D-A, which is designed to enhance network performance.

The switch comes with 16 x 10/100/1000Mbps Ethernet ports and uses 'store and forward' packet switching technology to ensure a reliable data transfer.

Eliminating the use of crossover cables or dedicated uplink ports, the device supports automatic MDI/MDI-X detection.

An ideal solution for small Ethernet work groups, the switch features duplex mode along with auto-sensing and auto negotiation of the highest available speed (10/100/1000Mbps), thus providing an automatic and flexible solution for the network.

With a capacity of 32Gbps, the switch offers data transfer rates at an average of 2000Mbps per port at full duplex mode.

The feature-rich Digisol DG-GS1016D-A is available via retail stores.

Address: Digisol Systems Ltd, Smartlink House, Plot No. 5, Bandra Kurla Complex Road, Santa Cruz (E), Mumbai 400098
