

“We'll continue to engage with and empower the developer community”

Over the years, and particularly in 2017, chatbots have found wide applications in large enterprises, enabling a better understanding of consumer behaviour. Innovations in artificial intelligence (AI) and machine learning (ML) technologies are expected to further enhance the features of chatbots. In a recent conversation, **Ravi Pinto**, *director - product management, Oracle Cloud Platform*, shared the significance of open source in Oracle's intelligent bots with **Syeda Beenish** of **OSFY**. He also talked about the success of 'Oracle Code', a free event for developers. Edited excerpts...

Ravi Pinto,
director-product management,
Oracle Cloud Platform
