Travel- and pocket-friendly leather headphones from Astrum

Leading 'new technology' brand Astrum has unveiled a travel-friendly headset – the HT600. The affordable yet stylish headphones come in a lightweight, compact design with no wires.

The headset's twist-folding design allows compact storage, making it easily portable. Packed with its own hard case and pouch, the leather headband ensures a perfect fit with foam earcups.

The headphones come with noise-cancelling technology and 3.5mm drivers, delivering the full range of deep bass and clear high notes. These also come with handy controls, conveniently placed on the outside of the device for users to easily pause, play or rewind the music.

The HT6000 supports Bluetooth version 4.0, and can be paired with two smartphones on the go. It comes with a built-in microphone to make or receive calls. With NFC technology, a user can simply pair the headphones by touch to non-stop music. The headphones offer up to 96 hours of standby and eight hours of call and playback on a single charge, company sources claim.

They are available in black colour online and at retail stores.

Fitness smartwatch with the 'tap to pay' feature from Garmin

Innovative GPS technology firm, Garmin, has unveiled its latest smartwatch – the Vivoactive 3, in India. It is the first smartwatch from the company to offer a feature like 'tap and pay'.

The device offers contactless payments and has 15 preloaded sports apps along with inbuilt GPS functionality.

With the company's in-house chroma display with LED backlighting, the smartwatch features a 3.04cm (1.2 inch) screen with a 240 x 240 pixel screen resolution. Its display is protected by Corning Gorilla Glass 3 with a stainless steel bezel, and the case is made of fibre-reinforced polymer.

The device offers 11 hours of battery life with GPS mode, company

This activity tracker from Timex has an SOS trigger

Timex, the manufacturer of watches and accessories, has recently expanded its product portfolio by launching its latest activity tracker in India – the Timex Blink.

The device is a blend of a traditional watch and a fitness tracker, and uses Bluetooth to connect with a smartphone. Apart from just being a funky watch, the device is designed to track all day-to-day activities such as calories burnt, distance covered, hours of sleep, etc. The tracker is capable of sending instant mails and SMSs with the GPS location of the user in case of an emergency.

Compatible with both Android and iOS, the Blink activity tracker comes with a 2.28cm (0.9 inch) OLED touchscreen display with a stainless steel 304L case and six-axis motion sensors, an SOS trigger and a Nordic nRF52832 CPU. Backed
