

DVD OF THE MONTH

Here are three stable operating systems to try out.

PCLinuxOS Mate 2018.06 (Live)

PCLinuxOS is a free, easy-to-use Linux based operating system for x86_64 desktops or laptops. The MATE desktop edition is a popular, multi-platform environment for your computer. MATE's focus is ease of use and stability, and it provides all the common tools computer users expect from a modern computing environment. You can use the bundled DVD to try out the OS in live mode.

openSUSE Leap 15

OpenSUSE is the makers' choice for sys admins, developers and desktop users. This is a user friendly Linux distribution and stabilised operating system with openSUSE's regular release. It is for both new and experienced Linux users. Install it on your desktop, configure your system and enjoy this platform of choice for Linux developers, administrators and software vendors. You can find the ISO image of the GNOME and KDE live edition in the *other_isos* folder on the root of the DVD.

Linux Lite 4.0

Linux Lite is a beginner-friendly Linux distribution based on Ubuntu's long-term support (LTS) release and it features the Xfce desktop. You can find the ISO image in the *other_isos* folder on the root of the DVD.

What is a live DVD?

A live CD/DVD or live disk contains a bootable operating system, the core program of any computer, which is designed to run all your programs and manage all your hardware and software.

Live CDs/DVDs have the ability to run a complete, modern OS on a computer even without secondary storage, such as a hard disk drive. The CD/DVD directly runs the OS and other applications from the DVD drive itself. Thus, a live disk allows you to try the OS before you install it, without erasing or installing anything on your current system. Such disks are used to demonstrate features or try out a release. They are also used for testing hardware functionality, before actual installation.

To run a live DVD, you need to boot your computer using the disk in the ROM drive. To know how to set a boot device in BIOS, please refer to the hardware documentation for your computer/laptop.
