Mini projectors from Canon now available in India

Canon has launched two mini projectors in India – the RAYO R4 and RAYO i5.

Targeted at both the B2B and B2C segments, the two flagship models are lightweight, portable and compact. The projectors aim to cater to travelling business professionals to help them in their presentations.

The RAYO R4 offers a 640x480 VGA display along with direct projection from smartphones and tablets via MHL cable connectivity, and offers 50 ANSI lm brightness. It can also be connected to a laptop via a mini HDMI cable. Backed by a 1,700mAh battery, the RAYO R4 can play for up to 150 minutes in standard brightness.

The RAYO i5 offers a 854x480 WVGA display along with wireless connectivity to avoid cable hassles, and allows users to share content from their Android/iOS devices via mirroring/DLNA technology. It offers stable and continuous brightness at 100 ANSI lm with WVGA resolution for home entertainment and business presentations. With a 1900mAh battery, the device has a play time of up to 120 minutes.

Both the projectors, R4 and i5, come with built-in speakers for diverse projection needs. They are available via company stores across India.

A panoramic camera with a fish-eye lens from iBall

iBall, the Indian manufacturer of computer peripherals, smartphones and tablets, has announced the availability of its latest security CCTV camera, which delivers panoramic views because it comes equipped with a fish-eye lens. The camera is cost-effective as it offers a 360-degree wide coverage to capture an entire area instead of setting up multiple traditional cameras.

The device has a 1.44mm super-wide lens and interactive 3D panoramic viewing for both Android and iOS devices, allowing users to keep an eye on every corner. It enables the user to monitor every angle with multiple views, which can be zoomed in and out in various modes such as fish-eye mode, cylindrical mode, grid mode, tile mode, split mode and top mode.

The camera offers quality images with its 2 megapixel high-resolution performance along with three inbuilt mini

matrix IR LEDs which assure users good visibility and clarity, even in low light and in the dark. It also comes with the H.264 video compression feature that compresses the videos, saving lots of space, along with microSD support of up to 64GB.

The fish-eye camera enables two-way live audio/video chats, and the motion-based alarm notifies security personnel on the phone itself.

This innovative camera is available at leading stores across India.

Wi-Fi solution from D-Link for your whole home

D-Link, one of the global leaders in networking devices, has recently launched Covr, its next-generation, whole-home Wi-Fi solution.

Powered by the Qualcomm Mesh Networking Platform, the device provides seamless whole-home network coverage, and provides the performance and connectivity required by multiple connected devices.

The device features 1,200 Mbps Wi-Fi, 2x3 (Rx) antennas at its core, and MU-MIMO technology for higher and more efficient throughput. It virtually eliminates annoying Wi-Fi dead spots to create a dedicated high-speed, seamless Wi-Fi zone for homes.

Price:
₹ 12,990

Covr comes with smart roaming to seamlessly connect to the strongest signal throughout the house, eliminating the need to disconnect or reconnect. It offers an expandable network by simply adding extra Covr points where more coverage is required.

With the 'Smart Steering' option, the device selects the best band for your device and even moves the devices between Wi-Fi bands when the network experiences congestion to offer the best performance possible.

The D-Link Covr is available in white, pink and blue, online and at retail stores.
