

Pocket-friendly smartphones from Motorola

Motorola, the Lenovo-owned smartphone manufacturer, has launched successors to last year's Moto G5—the Moto G6, along with the Moto G6 Play variant.

The dual-SIM (Nano) Moto G6 comes with a 39.8cm (5.7 inch) full HD+Max vision and an aspect ratio of 18:9. It is powered by an octa-core Qualcomm Snapdragon 450 processor clocked up to 1.8GHz with an Adreno 506 GPU. It comes in 3GB RAM + 32GB storage and 4GB RAM + 64GB storage variants.

Moto G6 runs Android 8.0 Oreo out-of-the-box and is backed by a 3,000mAh battery.

The device sports a dual camera setup with 12-megapixel and 5-megapixel sensors, and a 16-megapixel selfie camera on the front. The connectivity options

include 4G VoLTE, Wi-Fi 802.11, Bluetooth v4.2, etc.

The Moto G6 Play also comes with a dual-SIM (Nano) and runs Android 8.0 Oreo. It sports a 39.8cm (5.7 inch) HD(720x1440 pixels)+Max vision IPS display and is powered by an octa-core Snapdragon 430 SOC clocked up to 1.4GHz with an Adreno 505 GPU. It comes with 3GB of RAM and 32GB inbuilt storage that's further expandable up to 128GB via microSD card.

The G6 Play has a single rear camera with a 13-megapixel sensor and an f/2.0 aperture lens, and an 8-megapixel sensor paired with an 80-degree wide-angle lens and an f/2.2 aperture. The connectivity options for Moto G6 Play include 4G VoLTE, Wi-Fi 802.11 b/g/n, Bluetooth v4.2, etc.

Both the smartphones are available online and at retail stores.

Ultra-portable projector with Harman Kardon speakers launched in India

ViewSonic, a leading global provider of video solutions and products, has announced the availability of M1, an ultra-portable LED projector with built-in dual Harman Kardon speakers, in India.

The lightweight projector comes with a built-in battery that provides up to six hours of backup for on-the-go professionals, allowing them to share multimedia files easily.

With 16GB of built-in memory, the projector's LED technology offers up to 30,000 hours of usage.

The M1 has 250 ANSI lumens of brightness and is engineered with a 120,000:1 contrast ratio along with a short-throw lens to display large images in small spaces. It offers multiple connectivity options like HDMI, USB 2.0 and USB Type C, Audio Out and a microSD card reader, making it easy to share and view a variety of multimedia content. It uses the latest solid-state LED technology, making it mercury-free and lamp-free. It supports full HD (1080p) resolution and is also 3D compatible with optional PGD-350 3D glasses.

The projector comes with a 'smart stand', which is simple to set up and place in different positions and angles, and also doubles up as a lens cover.

The ViewSonic M1 projector is available online and at retail stores.
