Mini HD Wi-Fi home camera from D-Link

D-Link, a multinational manufacturer of communication devices, has launched its mini HD Wi-Fi camera – the DCS-P6000LH. This affordable surveillance camera is ultra-compact and inconspicuously designed, enabling it to blend in with any décor. Equipped with the mydlink cloud recording feature, it comes with 24-hour free video recordings, based on motion and sound, so that users can keep an eye on their homes or offices from anywhere.

This sleek, feature-loaded camera is a home security solution that is easy to set up and is the smallest camera from D-Link. Some of its exciting features include a built-in IR LED, which provides 5 metres of night vision in total darkness, and automatic push alert notifications. It comes with HD 720p video as well as a 120 degree wide-angle lens allowing users to view a wider area in high definition.

The D-Link DCS-P6000LH can be installed using just a three-step process, via Bluetooth 4.0 on the free mydlink Lite app, and can be accessed anywhere on iOS devices, Android devices and Windows phones.

It is available across India through D-Link's network of distributors and e-commerce websites.

Home entertainment projector from BenQ

BenQ has announced the availability of its TK800 DLP projector, which offers a true big-screen experience. The projector is enabled with HDR10 and is designed for well-lit living rooms. It is easy to set up and is aimed at sports enthusiasts, since it offers good picture quality and a customisable sports mode.

The projector features true 3840 x 2160 UHD resolution with 8.3 million distinct pixels and an innovative 4K colour wheel, in conjunction with 3,000 lumen high brightness. For lifelike realism, the projector comes with the Football and Sports audio-visual modes.

The TK800 has what the company claims is an industry-leading lamp life of up to 15,000 hours.

The device's CinemaMaster Audio+2 sound system has been newly

Harman launches truly wireless earphones in India

Samsung owned Harman International has recently launched JBL Free, a set of wireless earphones, in India. The company claims that the earphones offer up to 24 hours of playback on a single charge.

Designed to align with an active lifestyle, the ear buds feature 5.6mm drivers with a frequency response between 10Hz and 22KHz, and come with inbuilt JBL Signature Sound technology which offers an intelligent, intuitive sound experience.

The earphones come with a smart charging case, which provides over 20 hours of power, along with the 15-minute quick-charge technology, enabling the earphones to deliver music for up to four hours. The JBL ear buds come with three ear-tip sizes and two
