

Are you facing these issues  
at your workplace?

# Business Critical Apps Secured, Transparently

Enable users to work faster with a  
highly secure, yet simple to use  
secure access solution.

No IT Staff to  
manage security

MPLS failing you  
down due to last  
mile issues

No control over  
remote users

Difficulty in  
domain joining for  
remote workers

No control over  
cloud based(SaaS)  
applications for  
compliance

No detailed user  
activity report

- Hardware free, zero configuration, self-service
- Manage remote access securely
- Domain joining simplified
- MPLS failover made easy
- Control Cloud Applications: Google, MS O365, ZOHO, Salesforce, etc.
