

Why do OEMs and distributors of components **love IEW?**

It's a through-and-through **technology show**

It's held at **Bengaluru**—India's technology capital

It's core strength is that it's an expo with **tech conferences** and **workshops** in parallel

It's co-located with IOTshow.in. **IOT is the NEXT BIG** thing in electronics.

The key theme of the IEW is **innovative design** and **manufacturing** of electronics

Hence it's a **UNIQUE** show where you get to interact with **design engineers** and their **bosses**.

It's the best event for **DESIGN INS** and **DESIGN WINS**

"We are happy to be here at IOTshow.in and IEW 2018"

We are happy to be here at IOTshow.in and IEW 2018. I would say the result has been better than what we expected. More than 400 to 500 start-ups visited our booth. We got a good opportunity to engage with them, and they got to experience our solutions. I believe this event has initiated a long term relationship with these IOT and electronics start-ups.

Vishal Goyal,
Senior Marketing Manager,
ST Microelectronics India

"Our experience has been really good"

Overall, our experience has been really good. We have a good location for our booth. Plus, as per my estimates, 85 per cent of the visitors are amongst our target audience. We were able to connect with start-ups, developers and systems integrators. Application demos placed on our booth attracted large crowds. We would definitely like to participate in 2019 too!

Saswati Ray
Marketing Manager
Mouser Electronics

"This year has been exceptional"

We participate at IEW every year, and every year the response has been good for us. This year has been exceptional. We experienced a good turn-out on the first two days and today, too, the crowd seems to be good. Lots of people have been visiting our booth. The response has certainly been good for us. We wish to participate again in the coming editions of this event.
